CHAIRMAN'S STATEMENT 主席報告

BUSINESS REVIEW AND OUTLOOK

The global economy was severely impacted by several factors during 2020, primarily the effects from the global novel coronavirus (COVID-19) pandemic and the rising trade tensions between the US and China. As a result, the paper manufacturing industry has been faced with a number of challenges and adjustments. The COVID-19 pandemic was brought under control in China by the second half of 2020, enabling the resumption of production and a return to normal economic activities, which in turn led to both sales revenue and profit of the Group increasing for the second half of 2020 as compared with the first half of the year. For 2020, the Group recorded a total revenue of HK\$25.87 billion, decreasing by 4.7% from the previous year, while net profit increased by 10.7% to HK\$3.65 billion, and net profit attributable to owners of the Company for the year was HK\$3.52 billion. The earnings per share for the year were HK80.99 cents (2019: HK73.95 cents). The board of directors has proposed a final dividend of HK18 cents (2019: HK13 cents) per share for 2020. During the year, the aggregate sales of the Group amounted to 6.22 million tons, while its net profit per ton was HK\$587.

INDUSTRY AND BUSINESS REVIEW

With the promotion of supply-side reforms in Mainland China in recent years, as well as the restriction of new capacity investment owing to the tightening of environmental protection policies, both supply and demand within the industry have remained low. In the international arena, the signing of the first phase of the US-China trade agreement at the beginning of last year has reduced uncertainties. However, the COVID-19 pandemic and the ongoing tensions in the US-China relationship has affected consumer confidence. With the increase in the cost of paper production, the operation of the industry is still facing challenges. The Group has proactively responded to these changes in the market. We have been committed to developing a vertical business model through active consolidation of our upstream resources, covering pulp manufacturing and recycling of waste paper so as to achieve an integrated industrial chain ensuring the supply of raw materials. At the same time, the Group continues to expand its scale, control costs and strengthen production capacity leveraging its existing business; bringing more opportunities for business development and performance growth.

業務回顧及展望

2020年受全球新型冠狀病毒疫情以及中美緊張關係持續升溫等因素影響,全球經濟深受打擊,造紙行業也面對一定的挑戰和調整。隨著2020年下半年新型冠狀病毒疫情在中國受控,企業復工且經濟活動回歸正常,2020年下半年本集團銷售收入及利潤比上半年均有所提升。本集團2020年總收入比去年下跌4.7%至258.7億港元,純利上升10.7%至36.5億港元,年內本公司擁有人應佔純利則為35.2億港元。年內每股盈利80.99港仙(2019年:73.95港仙)。董事會建議2020年派發末期股息每股18港仙(2019年:13港仙)。本集團2020年總銷售量為622萬噸,產品平均每噸淨利潤為587港元。

BUSINESS PROSPECTS

The COVID-19 pandemic is under control in China and the domestic market is demonstrating a recovery in demand. In 2020, the GDP exceeded 100 trillion yuan for the first time. The Group will make a proactive effort to optimize the industrial chain in order to diversify its paper and pulp businesses. In the meantime, leveraging the foundation of its existing business, the Group will support the "Belt & Road" initiatives, targeting the Southeast Asia market for international development, and introduce new production capacities in countries such as Vietnam, Malaysia and Indonesia. In the future, we will continue to seek business opportunities in countries and cities along the Belt & Road and are confident in the long-term development of the region's paper industry.

In regard to the tissue paper business, the Group considers it a major focus and has therefore established an integrated product chain. Lee & Man Paper has endeavored to improve the quality of consumer tissue and boost its scale of production. The Group produces natural bamboo unbleached tissue in order to satisfy people's needs for health and environmental protection as well as consumption requirements. The tissue business has maintained steady growth as a whole and our existing capacity reached up to 900,000 tons annually. The Group is focusing on the requirements of consumers and continues to adopt effective strategies for developing the tissue business.

Packaging paper remains the core business of the Group. With the increasing prevalence of online consumption in Mainland China and overseas, there is growing demand for quality packaging paper in the market. This coupled with the implementation of plastic limit order in Mainland China are favorable to the Group's packaging paper business. To cope with the full import ban on waste paper in Mainland China, effective from 2021, the Group will actively develop the recycled pulp business in Southeast Asia to replace imported waste paper and strengthen the allocation of raw materials in order to ensure its production cost advantage.

業務前景

衛生紙業務方面,本集團高度重視生活用紙業務,已經實現全產品鏈打造。理文造紙一直致力於提高生活用紙的質量和生產規模,所生產之天然竹纖維原色衛生紙,能滿足消費者對健康和環保的要求,以及消費需求。本集團衛生紙業務總體發展平穩,現時總年產能已達90萬噸,將以市場及客戶需求為導向,繼續採取有效的策略來發展衛生紙業務。

包裝紙業務是本集團的主要核心業務。隨著內地和海外的網購越來越盛行,市場對高質量包裝紙需求亦日益增加,加上內地推行限塑令,有利本集團包裝紙業務。為配合國內2021年起全面禁止進口廢紙,本集團將積極在東南亞地區拓展再生紙漿業務以替代進口廢紙,增強原材料配置,確保生產成本優勢。

CHAIRMAN'S STATEMENT (CONTINUED) 主席報告(續)

While providing quality products at reasonable prices to maintain its competitiveness, the Group is also committed to fulfilling its corporate social responsibility. It has reduced pollution and carbon emission by recycling waste paper and adopting advanced production technology so as to bring more eco-friendly products to customers. In the long term, the paper manufacturing industry will still have greater room for development. The Group will capture the opportunities to expand its market scale and maintain the Group's competitiveness in the paper manufacturing industry.

本集團致力以優質產品及合理價格取勝, 同時亦盡力履行企業社會責任,透過廢紙 回收及先進生產技術減低污染和碳排放, 為客戶帶來更多具環保元素的產品。長遠 而言,造紙行業仍然有比較大的發展空 間。本集團將抓住機遇,拓展市場規模, 保持本集團在造紙行業的市場競爭力。

Air Emissions

氣體排放

To ensure sufficient power supply for operating paper-making machines in our production, the plants of the Group have had their own thermal power stations operating coal-fired generators and therefore, there have been gas emissions including nitrogen oxides and sulphur oxides. Different plants of the Group have established energy-saving policies to regulate energy consumption for production activities and offices. Relevant measures also include formulation of energy consumption targets, establishment of an inspection system for energy usage, training programs and promotion for energy conservation etc.

為確保造紙機器運作過程中有足夠的電力 供應,本集團的工廠均自設熱電站。熱電 站通過燃煤發電機組發電,因而產生一定 的氣體排放,包括氮氧化物和硫氧化物。 本集團各廠房均已施行節約能源政策以規 管生產活動及辦公場地中所耗用的能源, 相關措施亦包括制定耗能目標、建立能源 使用巡視檢查制度、進行節能培訓及宣傳 等。

Case Study: Environmentally friendly Thermal Power Station

個案研究:環保熱電站

Environmentally friendly circulating fluidised bed boilers used in our thermal power stations can achieve efficient combustion of all kinds of coal. As the combustion temperature in this kind of boilers is lower than that in pulverised coal boilers, less nitrogen oxides would be generated.

本集團的熱電站一致採用環保型的循環流 化床鍋爐,可以有效焚燒各煤種,該種鍋 爐燃燒溫度低於煤粉爐,產生的氮氧化物 排放較少。

In each coal-fired power station, the most advanced air emissions treatment facilities have been installed, including the employment of highly efficient bag filters to reduce ashes, SCR/SNCR de-nitration systems to eliminate nitrogen oxides, and limestone-gypsum flue gas desulfurisation system to curb sulphur dioxide gas. We have successfully reduced smoke and sulphur by more than 99.9% and 90% respectively.

每個燃煤發電廠均配備並使用最先進的廢氣處理設施,包括高效布袋除塵器去除煙塵; SCR/SNCR脱硝法去除氮氧化物;石灰石膏脱硫法去除二氧化硫等。目前煙塵去除率已達99.9%以上,脱硫率達90%以上。

Our effective wet desulfurisation facility further reduced sulphur dioxide emissions to much less than 400 mg/m³ as required by the "Emission Standard of Air Pollutants for Thermal Power Plants" (GB13223-2011) in China. The Group has monitored the quality of air emissions on a real-time basis by using online detection equipment to ensure outperforming the relevant national standard.

此外,我們高效的濕法脱硫措施,進一步把二氧化硫排放量降至遠低於國家GB13223-2011《火電廠大氣污染物排放標準》要求的每立方米400毫克標準。本集團通過在線監察設備實時監測排放廢氣的質量,確保排放水準低於國家規定的要求。

Circulating Fluidised Bed Boilers 循環流化床鍋爐

Sewage Discharge

Water is indispensable in paper production operations. In order to reduce sewage discharge generated from its production and improve quality of sewage treatment so as to meet regulatory standards, the Group has put efforts into the following three aspects:

Management Planning

- Established a sound "Guidelines for Sewage Treatment", setting out a list of key points for operating and inspecting sewage treatment facilities, procedures for repair and maintenance and duties of the relevant responsible teams, to further improve the performance of facilities and ensure its sewage output;
- Recruited sewage treatment technicians with professional qualifications and professionals responsible for reviewing the effectiveness of sewage treatment from auto-monitoring data;

污水排放

水是造紙生產過程中不可缺少的一環,為 減少生產過程中的污水排放,提高污水處 理品質,達到法規要求標準,本集團主要 從以下三方面著手:

管理規劃

- 訂立完善的《污水處理指引》,列出 污水處理設備的操作及檢查要點、 保養維護工序及相關負責團隊的職 務,進一步提升設備的運行效能, 保障輸出率;
- 聘請具專業資格的污水處理員和審 核自動監測資料有效性的審核人才;

Sewage treatment station 污水處理站

High-tech Treatment Techniques

- Introduced the most effective sewage treatment techniques employed by the paper-making industry worldwide, specifically the combined use of physiochemical coagulation-sedimentation pre-treatment, anaerobic + aerobic digestion and fenton technologies to achieve thorough treatment;
- Implemented the integrated management of sewage discharge.
 Our sewage treatment stations have been equipped with automatic programmable logic controllers and online surveillance systems to monitor the discharge of sewage;
- Strictly followed the monitoring requirements of the standards for water pollutants. With the use of internationally advanced sewage treatment techniques and facilities, we have successfully maintained stability in the volume and quality of sewage discharge, with the CODcr level of major pollutants as well as the levels of NH3-N and SS in full compliance with the maximum limits on discharges by pulp and paper-making operations under National Standard "GB3544-2008"(Standard on Discharge of Water Pollutants by the Pulp and Paper-Making Industry). After multiple treatments, sewage discharged by the Group's operations has achieved more than 99.5% of pollutants removal;
- Achieved water re-use by the rate of more than 80% in its production and water discharge less than 10 m³ per tonne of paper produced. Our sewage treatment stations have been equipped with water re-use systems to raise sewage re-use and reduce water consumption;

高科技處理工藝

- 引進全球造紙工業中最有效的污水 處理技術,採用混凝沉澱物化預處 理,厭氧+好氧處理及芬頓深度處理 的綜合工藝;
- 進行一體化管理,污水處理廠配備 了自動化程式控制邏輯控制器(PLC) 系統,並設有網上污水監察系統;
- 嚴密遵循水污染物監測標準的要求:本集團的污水處理工藝和設備達到國際先進水準,其中的主要污染物CODcr、NH3-N、SS完全達到GB3544-2008《製漿造紙工業水污染物排放標準》所列明的製漿和造紙企業排放限值要求。據統計驗證,經多重處理後,本集團排放的污水中99.5%以上的污染物已被去除;
- 生產用水循環利用率達80%以上, 造紙耗水強度低於10立方米/噸。 污水處理站配置水回用系統,提高 了污水回用率,減少了水資源耗用 量;

- Enabled a reasonable re-use of sludge and methane generated in the sewage treatment process. Water content of the sludge was lowered to around 50% with fully automatic recessed plate filters and then the dried sludge was burnt at thermal power stations in order to reduce solid wastes. The methane generated in the anaerobic treatment systems in the sewage stations was also collected and used as part of the fuel for the boilers in the power stations, thus greatly saving the coal required.
- 合理回收利用廢水處理過程中產生的污泥和沼氣,採用全自動隔膜板框壓濾技術使污泥含水率降低至50%左右,並將壓榨過的乾污泥輸送至熱電站進行焚燒,減少固廢污染。污水站厭氧處理系統產生的沼氣亦被收集並輸送至電站鍋爐摻燒,大大節約了燃煤用量。

Compliance With Regulatory Standards

- Annual inspection on the air emissions and sewage disposal from boilers and sewage stations by environmental department;
- Conduct regular calibration for air emissions and sewage online monitoring systems;
- Conduct repair and maintenance for environmental equipment on a regular basis to meet the emission standards.

符合法規要求

- 每年聯繫環保部門對鍋爐和污水站 排放的廢氣、廢水進行監測;
- 定期對廢氣、廢水的線上連續監測 系統進行校對;
- 環保設備定期維護和保養,確保排 放達標。

Greenhouse Gas Emissions

Greenhouse gases of the Group are mainly emitted from coal-fired power generation. The plants have their own thermal power stations, producing electricity through operating coal-fired generators, which discharge greenhouse gases directly and indirectly. With regard to a series of emission reduction measures adopted this year, our greenhouse gas emission was reduced by 4.5% in 2020 as compared with the previous year, which showed our emission reduction accomplishments.

溫室氣體排放

本集團溫室氣體排放主要來自燃煤發電。 工廠自設熱電站,通過燃煤發電機組生產電力,導致直接及間接的溫室氣體排放。因應一系列新採取的減排措施,我們於2020年的溫室氣體排放較去年下降4.5%,展示了我們的減排成果。

Wastes

The wastes generated in our operations were mainly non-hazardous ones produced in the course of paper-making, together with a small quantity of wastes due to routine office work. In order to reduce and dispose of waste produced in the paper-making process, the Group has established the "Guidelines for Waste Management" to classify wastes of all production activities and clarify the workflow of processing. Policies also provide for guidelines for the storage, transport and disposal of wastes and require them to be recorded to ensure that treatment process is in compliance with rules and is safe.

The Group has principally reduced or disposed of wastes generated from its paper-making operations in three ways:

- Sewage treatment facilities in plants will filter sewage generated from the paper-making process. This process would generate certain amount of sludge. It is then burnt in boilers after treatment and deep drying. The energy generated by burning the waste in a circulating fluidised bed boilers could be reused in the paper-making process and therefore, not only secondary pollution would be avoided but also saving energy;
- The Group used lots of waste paper as a raw material in its paper-making operations, paper-making residue was left behind after extraction of useful fibres for the paper-making process. As the residue contained different impurities, the residue was carried to a washing line where reusable metal wires, aluminium cans and plastics in the residue were collected and sold to recyclers;
- Established "Directory of Hazardous Wastes", so as to segregate hazardous wastes before processing or disposal of the recyclable.

廢棄物

本集團營運所產生的廢物主要為造紙過程 中所產生的無害廢棄物,亦有少量日常行 政辦公所產生的廢棄物。針對造紙過程中 所產生的廢棄物的減少和處理,本集團所 設立《廢棄物管理指導書》對本集團所有 動生產的廢棄物進行分類,明確其處理操 作流程。政策亦為廢棄物的存放、運輸及 處置提供指引並要求記錄在案,確保處理 過程安全合規。

本集團主要通過以下三種方式處理廢棄 物:

- 工廠的污水處理設施過濾造紙過程中所產生的污水,平均每月會產生過萬噸污泥。污泥經處理及深度脱水後被送至鍋爐焚燒,通過迴圈流化床鍋爐焚燒的廢物所產生的能量用於造紙生產,不但不會造成二次污染,還節省了能源消耗;
- 本集團在造紙生產過程中使用大量 廢紙作為原料,廢紙經提取有用的 造紙纖維後剩下造紙廢渣。本集團 把造紙廢渣引進洗水線提取有價值 雜質,如鐵絲、塑膠等,並將此等 物料出售予回收商進行回收再造;
- 編製《危險廢棄物匯總表》,明確分 類危險廢棄物,繼而處理或出售可 回收部分。

Sludge recycling equipment 污泥回收設備

The Group has actively adopted the aforesaid measures of treating wastes, striving to meet the standard of processing solid wastes, liquid wastes and hazardous wastes stipulated in the "Measures of Guangdong Province on Implementation of Administrative Licensing for Controlled Waste Treatment" and the "Measures on the Management of Hazardous Waste Transfer".

集團積極使用上述措施處理廢棄物,務求 100%達到《廣東省嚴控廢物處理行政許 可實施辦法》和《危險廢物轉移聯單管理辦 法》法規所要求的固廢、液廢和危廢執行 處理標準。

USE OF RESOURCES

With sustainable development as the prerequisite, the Group sets goals for resource consumption to protect environment, to make rational and scientific use of energy and resources and to reduce production costs. The Group has formulated the "Guide for Energysaving and Control and Management of Resources" to regulate the use of energy and resources in various activities. The policy specifies the responsibilities of and division of labour among departments, whereby departments related to production including the procurement department, the production department and departments using maintenance workshops and facilities are required to control the consumption of energy and resources such as raw materials, equipment, water, electricity, paper, packaging materials and so on. Administrative departments including the human resources department, the administration department, the logistics department and so on are responsible for carrying out resourcessaving education for all employees of the Group, monitoring, recording and comparing the monthly usage of energy and resources. Generally speaking, the Group takes "education as principal and supplementing with management and control" as the guideline for resources-saving, and lead employees to implement green production. The Group has also set targets for coal, electricity and water usage for the year by achieving 1% reduction in consumption per unit production of major factories on yearly basis compared with that of corresponding period in last year and will conduct year-end review of the amount of resources usage for the year in order to pursue better environmental performance on an ongoing basis.

資源使用

本集團以可持續發展為前提,訂立多項資 源降耗目標,致力於保護環境,合理科學 地使用能源及資源,並降低生產成本。本 集團編製了《節約能源資源控制管理指導 書》以規範各活動中能源及資源的使用。 該政策統一釐定了各部門的職責及分工, 生產相關部門包括採購部、生產部、維修 車間及設備使用部門等均需控制原材料、 設備、水、電、紙、包裝物料等能源及資 源的耗用,而行政部門包括人事部、行政 部、後勤部等則需負責對本集團全員進行 節約資源教育、監察、記錄及對比每月能 源及資源的使用情況。整體而言,本集 團以「思想教育為主、管理監控為副」作 為節約資源的指導方針,帶領員工實踐 環保綠色生產。本集團亦已訂立本年度 的煤、電、水的耗用目標,要求主要廠房 的單位產品消耗量每年度相對上年同比下 降1%,並於年末檢討本年度的資源使用 量,持續追求更環保表現。

The Group has actively adopted measures for energy conservation and emissions reduction, striving to curb energy consumption in each of its production processes. Apart from ISO50001 energy management certification, the Group has indeed received commendations of the Government Examination Team for Energy-Saving and Emissions Reduction for our promotion and implementation of various measures to save energy, reduce emissions and achieve environmental protection alongside economic growth. Measures for saving energy and reducing consumption include:

本集團積極開展節能降耗措施,致力降低生產過程中的能源耗量,並將節能降耗落實到每個生產環節,本集團對多項節能降耗以及有助於實現經濟與環境保護雙贏舉措的推廣與實施,除了獲得ISO50001能源管理系統認證外,也得到了國家節能減排考核小組的表揚。所涉及的節能降耗措施包括:

- Reducing energy consumption by substituting highperformance equipment for older ones and making relevant changes to its electricity facilities;
- 選購高效設備、改造用電設施,減少耗能;
- Adopting efficiency-enhancing and energy-saving technologies such as the full use of frequency conversion and high voltage compensation devices;
- 全面推廣變頻控制、高壓補償等節 能技改方案,提高效率;

The Group has installed water and electricity meters in various regions of the plants and implemented a system of rewards and punishments;
- 採用有效的能源計量、監測、統計和考核制度,設計相應的能源管理協位,幫助本集團對能源進、出廠及生產系統、非生產系統的能源消耗進行嚴格監管。本集團已於廠房的各區域安裝水錶及電錶,並實行獎優罰劣制:
- Departments are required to conduct data analysis and comparisons on a monthly basis to effectively promote energy conservation and environmental protection to the whole Group.
- 部門需每月對其進行資料統計及對 比,有效推動節能環保至本集團的 每一個角落。

Energy Consumption

The logistics and production processes in our daily operations have involved the use of great amounts of energy. Diesel and coal have been the major energy sources we used. Each plant has its own coal-fired generators to ensure availability of sufficient power necessary for the high power consuming paper-making machines, and therefore have not purchased electricity power from the national power grid.

Improving energy efficiency is one of the ways to effectively reduce energy consumption. To ensure coal quality has met standards, the Group adopts strict measures on management of coal storage and transportation. The Group also conducts regular repair and maintenance on generators to achieve an optimal operation of generators and efficient combustion of coal and in turn improve energy efficiency. In addition, the Group has also employed cogeneration technology to turn residual heat from the power generation process into heat source for use in paper-making, thus considerably raising the efficiency of energy use and reducing the consumption of coal.

Additionally, in order to achieve energy-saving and emission reduction, the Group requires the use of latest technologies in every segment along the production process. Moreover, the Group has introduced a number of projects which aimed at lowering energy consumption, For instance, there was frequency-conversion modification of high electricity-consuming machines which helped to achieve better energy saving performance and lowered the production cost. Moreover, methane and certain of the solid wastes which were side products in the sewage treatment process referred in the "Sewage Discharges" and "Wastes" sections above could be burnt in boilers in the thermal power stations, therefore saving fuel for the coal boilers.

能源耗量

本集團日常營運中的運輸及生產過程都需要大量能源供相關機械運作。本集團使用的主要能源分別為柴油和煤,各廠房均自設燃煤發電機組以確保為高耗電的造紙設備提供足夠電力,並沒有自國家電網購買電力。

提升能源效率是有效降低能源耗量的方法 之一。本集團採取嚴格措施管理煤的儲存 及運輸過程,確保煤炭品質達標,本集團 亦定期保養及維護發電機組,使機組在最 佳狀態下運行,充分燃煤,提升能源利用 率。此外,本集團也使用熱電聯產技術, 將發電的餘熱作為造紙熱源,大幅提高了 能源效率,減少煤耗。

此外,為達到節能減排目的,本集團力求在生產線的所有環節都採用最新的節能降耗技術,每年均進行多次節能改造項目,例如逐步將大能耗的電動機組改造為變頻控制,增加節能效率並減低生產成本等。此外,上述[污水排放]和[廢棄物]部分提到的污水處理過程中所產生的甲烷及部分固體廢物會被送至熱電站鍋爐燃燒,幫助節省燃煤鍋爐耗煤量。

The Group has also continued to optimise energy management. It has raised the efficiency of energy use both in the power generation process and in the paper-making process and have therefore successfully lowered the energy consumption per unit year by year. The Group regularly tracks and records energy consumption. During the Year, the overall energy consumption per tonne of paper produced by the Group was less than 0.34 tonne of standard coal, even lower than the national average which is approximately 0.60 tonne of standard coal comparatively.

本集團不斷優化能源管理,於發電過程以及造紙生產過程同時提高能源效益,使得單位能耗每年持續降低。本集團定期追蹤及記錄能源耗量,本年度內,本集團每生產一噸紙的綜合能耗少於0.34噸標準煤,遠低於每生產一噸紙耗用約0.60噸標準煤的全國平均數值。

Water Usage

As water has been a necessity for our paper-making operations, water used in our production has accounted for a major part of the Group's water consumption. In order to minimise the consumption of clean water resources, the Group:

 Regarding water source: the Group has upon governmental approval obtained its water supply by directly taking water from rivers and then carrying out purification process to satisfy the industrial water standard. In doing so, we have helped protect the valuable potable water resources.

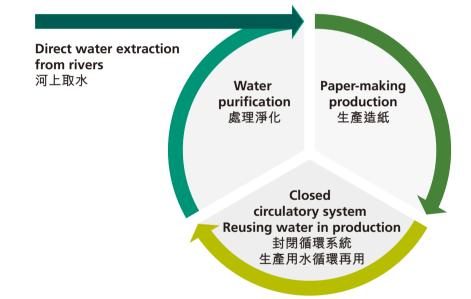

水資源利用

水是造紙過程中必需使用的資源,因此生 產用水構成了本集團耗水量的絕大部分。 為降低潔淨水資源消耗,本集團在:

 來源方面:本集團經政府批示自行 從河上取水,在取用適用水源上無 任何問題。河水經處理淨化後滿足 工業用水標準,有利於保護珍貴的 飲用水資源。

- As for water saving: the Group encourages recycling and has principally adopted the strategy of employment of advanced and highly efficient sewage treatment techniques for reusing water in its production. The use of closed circulatory system for industrial water successfully increases the recycled water ratio in production to more than 80%. As a result, the amount of natural water required by the Group has been considerably lowered.
- 節約用水方面:本集團鼓勵循環再用,主要策略為通過先進、高效率的污水處理工藝將生產用水循環再用,並建立工業用水的封閉循環系統。生產過程中使用循環用水的比例超過80%,大大降低了天然水的取用。
- In regard to maintenance: to prevent leakage from water pipelines and to preserve water resources, the Group also checks water pipes and repairs water tanks, water taps and other water supply facilities regularly.
- 維護方面:安排專人定期檢查水管,修理水箱、水龍頭及其他供水設施,做好輸水管道的防滲漏工作,珍惜每一滴水資源。

Use of Packaging Materials

Some of our paper products required the use of plastic materials for packaging so as to prevent products from contamination or damages. The "Guidelines for Packaging Materials Management" is established by the manufacturing department for waste reduction purpose through packaging materials classification, labelling, storage and usage. Also, simple packaging will continue to be our principle so as to alleviate any environmental impacts.

Energy and Resource Usage Data

Through the above measures, the Group and our employees together achieved the objective of resources conservation. This year, energy and resource consumption in respect of production activities within the reporting scope of the Group were as follows:

包裝物料使用

本集團的部分紙類製品部分需使用塑膠套料進行包裝,以避免產品受污染或損毀。 本集團的生產部門已制訂了《包裝物料管 理指引》以規範包裝物料的分類、標識、 存放及使用,減少物料浪費。本集團亦會 繼續採用簡約包裝原則,減少對環境的影響。

能源及資源用量資料

通過以上措施,本集團與員工齊心協力實現了資源節約的目標。本年度內,本集團報告範圍內生產活動所對應的能源及資源用量如下:

ENVIRONMENT AND NATURAL RESOURCES

The use of the environment and natural resources is closely related to the climate change. The impact of commercial activities on the environment and natural resources has always been a great concern to the Group. As a commitment to reduce the logging of timber and reduce the impact of human activities on natural environment, we have been using recycled paper as the materials for paper-making, the primary business of the Group. In addition to complying with environmental regulations and international rules on protection for the natural environment, the Group has also incorporated concepts of environmental friendliness into our internal management and daily activities. In our striving to attain environmental sustainability, we have successfully received ISO 14001 Certification for Environmental Management.

With the aim of actively promoting environmental protection and efficient use of resources, we have monitored the potential effect of our business operations on the environment on an ongoing basis and promoted the green office and the green production environment in adherence to four principles, namely, "Reduce", "Re-use", "Recycle" and "Replace", in order to minimise the impact of our operations on the environment.

Noise Treatment

As our plants have been equipped with large paper-making machinery and coal-fired generators, their operation would cause rather big noises. In view of this, the Group has implemented the following measures:

 The Group has chosen to use low noise equipment and products as far as possible in the course of building the pulp and paper production lines and the thermal power stations in order that noises could be lowered at the sources;

環境及天然資源

對環境及天然資源的運用方式與氣候變化息息相關,本集團十分注重商業活動對氣候變化的影響。本集團的主要業務便包括廢紙回收再造,為減少林木砍伐,減少為活動對自然環境的影響作出貢獻。除了遵循相關環境法規及國際準則,適切地保護自然環境外,本集團亦將環境保護的概念融入了內部管理及日常營運活動,並順利通過了ISO 14001環境管理認證,致力達到可持續之環境目標。

本集團以積極推動環境保護及有效利用資源為宗旨,即時監察業務營運對環境帶來的潛在影響,並遵循減少、重用、回收及取代四個基本原則,推廣綠色辦公及綠色生產環境,將營運對環境的影響降至最低。

噪音處理

本集團廠房均設有大型造紙機械和燃煤發電機,因而會在造紙設備和發電機組運作時產生較大噪音。有見及此,本集團實施了以下措施:

 在製漿造紙生產線以及熱電站的搭 建過程中盡量選用低噪音的設備和 產品,從源頭降低噪音;

- In an effort to lower sound pollution to the environment, the Group has installed sound isolation facilities to contain noises due to running of machines and has added silencers on noisy equipment such as blowers and exhaust fans;
- The Group has built soundproof control rooms at the pulp and paper-making workshops where workers can work in a healthy environment without being influenced by the big noises;
- The Group has added more vegetation in the factory area to help dampen the spread of noises apart from purifying the air.

Timber Logging

Among the packaging paper produced by the Group, 98% was made from recovered paper and only 2% from timber virgin pulp. This was exactly an example of our utmost efforts to protect forests and creatures, and minimise the impact of our operations on the natural environment.

Though the pulp used in production is derived from timber logging, the Group has no activity in respect of deriving pulp directly from timber logging. In order to lower the price of raw materials and achieve the goal of environmental protection, the Group is committed to developing production machinery that can produce green sustainable product by treating tons of waste paper as raw material. In the future, the Group hopes to further raise the percentage of waste paper being used as raw material and become one of the containerboard manufacturers with the highest recycling rate in the world.

- 安裝隔聲降噪設施,應對機械運作 時產生的噪音,為風機、排氣等高 噪音設備安裝消音器,減少噪音帶 來的環境影響;
- 於製漿造紙車間設置相應的隔音控 制室,讓操作工人在隔音室內工 作,降低高噪音環境對員工健康的 影響;
- 增加廠房綠化植被的種植面積,幫助減弱噪音傳播,亦同時淨化空氣。

林木砍伐

本集團所生產包裝紙的原料,98%來自 回收廢紙,只有2%採用林木生產的原木 漿,旨在最大限度地保護林木和生物,把 對自然環境的影響降至最低。

本集團並無直接伐木取材之活動,但生產 所採用之木漿由砍伐林木而來。為降低原 材料價格並實現環保目標,本集團致力開 發處理以大量廢紙作原料的生產機器,生 產可持續發展的綠色產品。未來,本集團 希望進一步提高廢紙原料比例,並成為全 球箱板原紙生產商中廢紙再用率最高的企 業之一。

Environmentally Friendly Products

The Group invested in the research and development of environmentally friendly products maximising the efficiency of utilisation of wastes and minimising the addition of chemicals such as brightener and fluorescer. The Group currently produces products including environmentally friendly test linerboard and environmentally friendly coated white linerboard in pursuit of becoming a leader of green products in the industry with an aim to alleviate the environmental impact caused in the process from producing to using its products and thus offering more environmentally friendly choices to its customers.

Starting from the selection of raw material, the Group produces environmentally friendly test linerboard with 100% use of recycled waste corrugated board, and uses sorted clean newspaper as the main component of environmentally friendly coated white linerboard, turning wastes into treasures.

環保產品

本集團大力投入研發環保產品,最大幅度 提升廢料的使用效率及減少增白劑、螢光 劑等化學品添加。集團目前生產環保箱板 紙及環保塗布灰底白板紙,並持續追求成 為行業的綠色產品領先者,降低產品在生 產至使用過程中對環境的影響,為客戶提 供更多環保選擇。

集團從原材料選材入手,環保箱板紙原料 100%使用回收而來的廢舊箱板紙;環保 塗布灰底白板紙則以廢報紙為主要成分, 化廢為寶。

Cope with Climate Change

Global warming is notably affecting the natural climate by increasing the frequency and intensity of extreme weather and natural disasters such as rainstorm, flood and drought, which greatly aggravated the damage and impact of various natural disasters. To cope with the intensified threat of climate change, management of our Group has regularly assessed the potential risks that may arise from cause climate change during production and operation and adopted preventive and contingency measures.

We have strategically selected location for our plants and drawn up the "Extreme Weather Catastrophes Contingency Plan". We classify the extreme weather catastrophes into four degrees, namely very significant, significant, major and general according to the degree of harm that may be caused by such risks. Meanwhile, we have established a clear contingency system and set up the Steering Committee on Extreme Weather Contingency and Rescue, which expressly stipulates functions of each member, alert actions and contingency measures. We arrange publicity, trainings and drills for employees regularly, aiming at enhancing the vigilance and abilities towards disasters. We will assess how bad we will be affected by the extreme weather such as hurricane, rainstorm, thunder, hail and flood so that we can take relevant safety measures and provide a safe place for our employees. With these measures, we will safeguard our employees' safety and avoid losses arising from the malfunction of equipment. In addition, our plants have their own thermal power stations and backup power which are necessary for a continuous and stable production and can reduce the risk of halt in production due to regional power blackout.

氣候變化應對

全球變暖顯著影響自然氣候,使得極端天氣加劇,暴雨、洪水及乾旱等天災的頻率和強度增加,大幅加劇了各類天災的破壞及影響程度。為應對越趨嚴重的氣候威脅,本集團的管理層定期評估生產經營中因氣候變化而可能導致的潛在風險,並採取預防及應變措施。

我們策略性地為廠房選址,制定《極端天 氣災害應急預案》,按照風險可能造成的 危害程度,將極端天氣災害分為四個等 級:特別重大、重大、較大、一般。同 時,我們設立了清晰的應變體系,成立了 極端天氣應急救援領導小組,明文規定了 各成員職能、預警行動和應急措施。我們 亦會日常定期向員工進行宣傳、培訓和演 習,提高員工的警惕和應災能力,於颱 風、暴雨、雷電、冰雹、洪水等極端天氣 出現時評估影響,做好相關安全措施並提 供安全場所讓員工暫避,保障員工生命安 全並避免生產機械損失。同時,各廠房均 設有熱電站和後備電源,確保廠房持續穩 定的生產運作,降低因區域性停電而停產 的風險。

環境保育

本集團重視環境保護,積極投入地區的環保活動,守護大自然。本公司執行董事李文斌先生曾向新活力青年智庫慈善基金[[不要膠下去]環保活動]捐贈13萬港元,是次活動與著名攝影師和多位藝人合作,分享日常生活中減少使用及取代一次性塑膠的心得,希望鼓勵社會大眾養成減塑的習慣。

In addition, the Group has collaborated with the Environmental Protection Administration of Yongchuan District of Chongqing for the "Daluxi River Regulation Project". In recent years, the rapid social and economic development in Yongchuan District and the development of towns along the Daluxi River and the industrial development have resulted in the discharge of a large amount of industrial sewage and untreated domestic sewage. Coupled with the water interception by upstream hydropower stations, the water quality of Daluxi River has deteriorated. River management helps to improve water quality and preserve natural environment. By establishing the concept of ecological environmental protection in the community, it takes both economic development and environmental protection into consideration.

此外,本集團與重慶市永川區環境保護局合作支援「大陸溪河治理專案」。近年來隨著永川區社會經濟的快速發展和大陸溪河沿岸鄉鎮及工業的發展,大量工業廢水及未經處理的生活污水的排入,加之上游水電站的截流,致使大陸溪河流域水質退化。通過河水治理,有助優化水質,保育天然環境,在社區樹立生態環保理念,同時顧及經濟發展和環境保護。

Support for the Under-privileged

The Group donated over RMB100,000 to support the charity project of the "Highway Construction for Alleviating Poverty in Siming Village" by Chongging Charity Federation, promoting the infrastructure construction in Siming Village. Maintenance personnel have repaired 4.4 kilometers of village roads, which enabled personnel and resource flows of the village. By installing 14 kilometer-long mountain road protective barriers, it protects the safety of villagers on the road, conveying our concern and care. In terms of weak collective economy of villagers, leaders specialising in plantation and cultivation industry have facilitated the development of plantation and cultivation industry so as to improve product quality and activate branding effect. Meanwhile, we have established the online sales channel for marketing the villagers' specific farm products and wild mushrooms in order to enhance their popularity. To teach someone how to fish is better than to just give him a fish, only in this way can the villagers be self-sufficient and expand the ways of getting rich.

弱勢支援

本集團向重慶市慈善總會「四明村扶貧公路建設」贊助了十數萬元人民幣,以推進四明村基礎設施建設。維修人員修繕村道4.4公里,讓村內人員及資源流通,並加裝14公里山路防護欄,為村民外出保護航,用關懷傳遞溫情。針對村民集體經濟薄弱問題,養殖業專業負責人牽頭推動村內種養殖業發展,提高產品品質和形成品牌效應,並為村農特有產品、野生菌類建立線上銷售管道,提高知名度,授人以漁,讓他們能在未來自給自足,拓展致富路。

Meanwhile, the Group donated RMB50,000 to the "Yongchuan Examination Fund for Cervical Cancer and Breast Cancer" jointly established by Chongqing Women's Federation and Chongqing Health Committee. The fund focuses on contributing resources on examination of cervical cancer and breast cancer which pose serious threat to women's health. Since the launch of free screening for cervical cancer and breast cancer in Yongchuan District in 2009, the project has covered 23 towns and districts and completed the examination of cervical cancer and breast cancer for 235,787 women with detection of 422 cancer and lesion before cancer cases. 264 women from impoverished villages have received timely aid.

同時,本集團向重慶市婦女聯合會和重慶市健康委員會合辦的「永川兩癌篩查基金」捐贈了5萬元人民幣,此基金致力投放資源在嚴重威脅婦女健康的宮頸癌和乳腺癌的檢查工作,永川區自2009年開展兩癌免費篩查項目以來,已覆蓋23個鎮街,累計完成235,787名婦女兩癌篩查,檢出癌及癌前病變422名,264名貧困農村婦女得到了及時救助。

Dr. Lee Wan Keung Patrick, Honorary Chairman of the Group, also adheres to the principle of "Great love beyond borders, persistence in doing good" and has established Charity Foundation Fund for charitable causes. The main targets of the Charity Foundation Fund are the impoverished households, orphans and abandoned children. During the year, we visited extremely impoverished families, donated supplies to charity schools, and supported poor children's education.

本集團榮譽主席李運强博士亦秉承「大愛無疆,為善有恆」之宗旨,成立了恒善基金以行慈善公益。恒善基金的主要援助對象為社會特困戶、孤兒及棄兒等,在年內曾走入深度貧困家庭訪貧問暖,捐贈物資至公益學校,助學貧窮兒童等。

In addition, the Lee Wan Keung Scholarship was also established, demonstrating the zeal of our founders for corporate social responsibility.

青年發展

本集團的創辦人對推動教育和青少年發展的事業上不遺餘力,曾多次斥資興建多所教育設施,包括在2003年由李文俊博士捐資興建的海南省瓊海市嘉積中學李强學苑及2011年由李文斌先生捐贈助建的香港嶺南大學李運强教學大樓,並設立李運强獎學金,充分顯示了本集團各創辦人的對企業社會責任的熱忱。

The Group is also concerned about cultivating the youth to become future pillars of society. Mr. Lee Man Bun donated HK\$1.20 million to Hong Kong New Youth Energy Think Tank and sponsored HK\$300,000 to its charity show "The Sassy Princess" performed by Fuk Sing Opera Troupe, aiming at promoting the communication of youth organizations between Hong Kong and Mainland and encouraging the youth to make contribution and commitment to social affairs and public services.

本集團亦關心並培養青年人成為未來社會 棟樑,李文斌先生曾向新活力青年智庫慈 善基金捐贈120萬港元,並贊助其慈善專 場《福升粵劇團戲寶•宮主刁蠻駙馬驕》 30萬元港幣,促進香港與內地青年組織的 交流,鼓勵青年對社會事務及公眾服務承 擔責任並作出貢獻。

Key audit matter 關鍵審計事項

Impairment assessment of trade receivables 應收貿易賬款之減值評估

We identified impairment assessment of trade receivables as a key audit matter due to the significance of trade receivables to the Group's consolidated financial position and the involvement of subjective judgment and management estimates in evaluating the expected credit losses ("ECL") of the Group's trade receivables at the end of the reporting period.

本行識別應收貿易賬款之減值評估為關鍵審計事項因應收貿易 賬款對集團綜合財務狀況表之重要性及於報告期末就集團之應 收貿易賬款之預期信貸虧損(「預期信貸虧損」)評估涉及主觀判 斷及管理層的估計。

As at 31 December 2020, the Group's net trade receivables amounting to approximately HK\$3,225,919,000, which represented approximately 7% of total assets of the Group.

於2020年12月31日,集團應收貿易賬款淨額合共約3,225,919,000港元,佔集團總資產約7%。

How our audit addressed the key audit matter 本行如何處理關鍵審計事項

Our procedures in relation to impairment assessment of trade receivables included: 本行就應收貿易賬款減值評估的步驟包括:

- Understanding how the impairment loss of trade receivables has been estimated by management and the approval procedures for recognising the impairment loss on trade receivables;
- 理解管理層如何估計應收貿易賬款 減值虧損及確認應收貿易賬款確認 減值虧損之審批程序;
- Testing the accuracy of the ECL adjustment made by the management and independent qualified professional valuer;
- 測試由管理層及獨立合資格專業估價師對預期信貸虧損所作調整之準確性:

KEY AUDIT MATTER (CONTINUED)

關鍵審計事項(續)

Key audit matter 關鍵審計事項

How our audit addressed the key audit matter

Impairment assessment of trade receivables 應收貿易賬款之減值評估

As disclosed in note 4 to the consolidated financial statements, the management of the Group estimates the amount of ECL of trade receivables based on provision matrix through grouping of various debtors that have similar loss patterns, after considering internal credit ratings of trade debtors, aging, repayment history and/or past due status of respective trade receivables. In calculating the ECL, the loss rates are estimated based on comparable probability of default from internal credit ratings through groupings of various debtors that have similar loss patterns and recovery rate quoted from international credit-rating agencies and adjusted for forwardlooking information that is available without undue cost or effort. In addition, credit-impaired trade receivables are assessed for ECL individually. The loss allowance amount of the credit-impaired trade receivables is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows with the consideration of expected future credit losses.

如綜合財務報表附註4所披露,集團管理層根據預繳模式,通 過具備類似虧損模式的不同債務人組合,經考慮貿易債務人之 內部信貸評級、賬齡、還款記錄及/或個別應收貿易賬款之逾 期狀況,估計應收貿易賬款之預期信貸虧損金額。於計算預期 信貸虧損時,損失率根據內部信用評級的可比較違約概率進行 估算,而可比較違約概率乃通過將具備類似虧損模式及追償率 (國際信用評級機構所引用)之不同債務人進行分組,並就無需 花費成本或精力便可得之前膽性資料作調整而得出。此外,信 貸減值之應收貿易賬款就預期信貸虧損作個別評估。信貸減值 之應收貿易賬款之虧損撥備金額乃按資產之賬面值與預期未來 信貸虧損的代價之預測未來現金流量現值之差額來計量。

As disclosed in note 8 to the consolidated financial statements, the Group recognised a reversal of an amount of HK\$59,961,000 in respect of impairment losses of trade receivables for the year. 如綜合財務報表附註8所披露,集團年內就應收貿易賬款確認

減值虧損回撥金額為59,961,000港元。

OTHER INFORMATION

The directors of the Company are responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF DIRECTORS AND THOSE CHARGED WITH GOVERNANCE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

董事及負責管治人員就綜合財務 報表須承擔的責任

貴公司董事須負責根據香港會計師公會頒 布的香港財務報告準則及香港公司條例披 露規定編製真實而公平的綜合財務報表, 以及董事釐為必須的內部監控,以使編製 的綜合財務報表不存在由於欺詐或錯誤而 導致的重大錯誤陳述。

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- 了解與審計相關的內部控制,以設計適當的審計程序,但目的並非對 貴集團內部控制的有效性發表意見。

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine that matter that was of most significance in the audit of the consolidated financial statements of the current period and is therefore the key audit matter. We describe this matter in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

notes:

- (i) The capital contribution reserve arose from the disposal of subsidiaries in prior years to a wholly owned subsidiary of the Group's then ultimate holding company.
- (ii) In accordance with the provisions of the Macao Commercial Code, the Company's subsidiaries in Macau are required to transfer a minimum of 25% of the annual net profit to a legal reserve, whenever dividend is declared by the subsidiaries, until the reserve reaches half of the capital of the subsidiaries. The reserve is not distributable to the shareholders.
- (iii) The special reserve represents the difference between the nominal value of the aggregate share capital of the subsidiaries acquired by the Group pursuant to the corporate reorganisation in September 2003, and the nominal value of the Company's shares issued for the acquisition.
- (iv) The other reserve arose from the acquisition of equity interests in subsidiaries from their non-controlling shareholders in prior years.
- (v) During the period from 20 December 2018 to 28 December 2018, 2,638,000 ordinary shares of the company were repurchased at an aggregate cost of HK\$17,236,000. Subsequently, the repurchased shares were cancelled on 29 January 2019, and accordingly, the Company's share capital and share premium were reduced by HK\$66,000 and HK\$17,170,000 respectively.

- (iii) 特別儲備指根據本集團於2003年9月為重組收購所得的附屬公司的股本面值總額與本公司就收購事項而發行的股份面值的差額。
- (iv) 其他儲備由過往年度向附屬公司之非控股股東 收購其於附屬公司股權權益產生。

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies set out below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristic of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of HKFRS 2 Share-based Payment, leasing transactions that are accounted for in accordance with HKFRS 16 Leases ("HKFRS 16"), and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 Inventories, or value in use in HKAS 36 Impairment of Assets.

3. 主要會計政策(續)

綜合財務報表按歷史成本法編製, 惟於每個報告期末按公允值計量之 若干金融工具除外,會計政策闡述 於下文。

歷史成本一般按照交換貨物及服務 所付代價之公允值。

公允值為於計量日期在市場參與者 之間進行有序交易就出售資產所收 取或轉讓負債所支付的價格,不論 該價格是直接可觀察或使用另一種 估值方式估計得出。在估計一項資 產或負債之公允值時,本集團考慮 市場參與者於計量日期為該資產或 負債定價時會考慮之特質。就於該 等綜合財務報表中計量及/或披露 之公允值乃按此基準釐定,惟於香 港財務報告準則第2號以股份為基 礎付款範疇下的以股份為基礎付款 之交易、按照香港財務報告準則第 16號租賃(「香港財務報告準則第16 號」)入賬之租賃交易及一些類似公 允值但非公允值的計量(例如香港會 計準則第2號存貨之可變現淨值或香 港會計準則第36號資產減值的使用 價值)則除外。

For The Year Ended 31 December 2020 截至2020年12月31日止年度

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

In addition, for financial reporting purpose, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

3. 主要會計政策(續)

此外,就財務申報而言,公允值計量根據公允值計量輸入數據之可觀察程度及輸入數據對公允值整體計量之重要性被分類為第1、第2或第3級,載述如下:

- 第1級輸入數據為實體於計量 日期在活躍市場就相同資產或 負債取得之報價(未經調整);
- 第2級輸入數據為就資產或負 債直接或間接可觀察之輸入數 據,包括在第一級內之報價除 外;及
- 第3級輸入數據為資產或負債 的不可觀察輸入數據。

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The principal accounting policies are set out below.

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved where the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

3. 主要會計政策(續)

主要會計政策載列如下:

綜合賬目基準

本綜合財務報表包含本公司以及由 本公司及其附屬公司控制的實體之 財務報表。取得控制權是指本公司:

- 對被投資方行使權力;
- 因參與被投資方之業務而獲得 或有權獲得可變回報;及
- 有能力行使其權力而影響其回 報。

倘事實及情況顯示上述三項控制元 素其中一項或多項改變,則本集團 會重新評估其是否仍然控制被投資 方。

損益及其他全面收益的各個項目乃 歸屬於本公司擁有人及非控股權 益。即使會導致非控股權益出現虧 絀結餘,附屬公司之總全面收益仍 會歸屬於本公司擁有人及非控股權 益。

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Basis of consolidation (Continued)

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Business combinations or asset acquisitions

Optional concentration test

Effective from 1 January 2020, the Group can elect to apply an optional concentration test, on a transaction-by-transaction basis, that permits a simplified assessment of whether an acquired set of activities and assets is not a business. The concentration test is met if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets. The gross assets under assessment exclude cash and cash equivalents, deferred tax assets, and goodwill resulting from the effects of deferred tax liabilities. If the concentration test is met, the set of activities and assets is determined not to be a business and no further assessment is needed.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Business combinations or asset acquisitions (Continued)

Asset acquisitions

When the Group acquires a group of assets and liabilities that do not constitute a business, the Group identifies and recognises the individual identifiable assets acquired and liabilities assumed by allocating the purchase price first to financial assets/financial liabilities at the respective fair values, the remaining balance of the purchase price is then allocated to the other identifiable assets and liabilities on the basis of their relative fair values at the date of purchase. Such a transaction does not give rise to goodwill or bargain purchase gain.

Investment in a joint venture

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investment in a joint venture (Continued)

The results and assets and liabilities of joint venture are incorporated in these consolidated financial statements using the equity method of accounting. The financial statements of joint ventures used for equity accounting purposes are prepared using uniform accounting policies as those of the Group for like transactions and events in similar circumstances. Under the equity method, an investment in a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the joint venture. When the Group's share of losses of a joint venture exceeds the Group's interest in that joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the joint venture.

An investment in a joint venture is accounted for using the equity method from the date on which the investee becomes a joint venture. On acquisition of the investment in a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

For The Year Ended 31 December 2020 截至2020年12月31日止年度

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Investment in a joint venture (Continued)

The Group assesses whether there is an objective evidence that the interest in a joint venture may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with HKAS 36 *Impairment of Assets* as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill, that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with HKAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When a group entity transacts with a joint venture of the Group, profits and losses resulting from the transactions with the joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the joint venture that are not related to the Group.

3. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue from contracts with customers

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the Group performs; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

Revenue from contracts with customers (Continued)

A contract asset represents the Group's right to consideration in exchange for goods or services that the Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with HKFRS 9 *Financial Instruments* ("HKFRS 9"). In contrast, a receivable represents the Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer.

A contract asset and a contract liability relating to a contract are accounted for and presented on a net basis.

The Group recognises revenue under the following accounting policies:

- Revenue from sale of packaging paper, pulp and tissue paper is recognised at a point in time when the customer obtains control of goods;
- (ii) Revenue from supply of steam and electricity is recognised at a point in time upon transition of steam and electricity to users; and
- (iii) Revenue from rendering of wharf cargo handing service is recognised over time because the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs.

Leases

Definition of a lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

For contracts entered into or modified on or after the date of initial application or arising from business combinations, the Group assesses whether a contract is or contains a lease based on the definition under HKFRS 16 at inception, modification date or acquisition date, as appropriate. Such contract will not be reassessed unless the terms and conditions of the contract are subsequently changed. As a practical expedient, leases with similar characteristics are accounted on a portfolio basis when the Group reasonably expects that the effects on the consolidated financial statements would not differ materially from individual leases within the portfolio.

The Group as a lessee

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to leases of staff quarters and office properties that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the recognition exemption for lease of low-value assets. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis or another systematic basis over the lease term.

Right-of-use assets

The cost of right-of-use asset includes:

- the amount of the initial measurement of the lease liability;
- any lease payments made at or before the commencement date, less any lease incentives received; and
- any initial direct costs incurred by the Group.

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities.

Right-of-use assets in which the Group is reasonably certain to obtain ownership of the underlying leased assets at the end of the lease term are depreciated from commencement date to the end of the useful life. Otherwise, right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term.

The Group presents right-of-use assets that do not meet the definition of investment property as a separate line item on the consolidated statement of financial position. The right-of-use assets that meet the definition of investment property are presented within "investment properties".

Refundable rental deposits

Refundable rental deposits paid are accounted under HKFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments and included in the cost of right-of-use assets.

Lease liabilities

At the commencement date of a lease, the Group recognises and measures the lease liability at the present value of lease payments that are unpaid at that date. In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable.

The lease payments include:

- fixed payments (including in-substance fixed payments) less any lease incentives receivable;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Group under residual value guarantees;
- the exercise price of a purchase option if the Group is reasonably certain to exercise the option; and
- payments of penalties for terminating a lease, if the lease term reflects the Group exercising an option to terminate the lease.

The Group remeasures lease liabilities (and makes a corresponding adjustment to the related right-of-use assets) whenever:

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the related lease liability is remeasured by discounting the revised lease payments using a revised discount rate at the date of reassessment.
- the lease payments change due to changes in market rental rates following a market rent review/expected payment under a guaranteed residual value, in which cases the related lease liability is remeasured by discounting the revised lease payments using the initial discount rate.

Lease modifications

The Group accounts for a lease modification as a separate lease if:

- the modification increases the scope of the lease by adding the right to use one or more underlying assets; and
- the consideration for the leases increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that standalone price to reflect the circumstances of the particular contract.

For a lease modification that is not accounted for as a separate lease, the Group remeasures the lease liability based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Group accounts for the remeasurement of lease liabilities by making corresponding adjustments to the relevant right-of-use asset. When the modified contract contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the modified contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

Leases (Continued)

The Group as a lessor

Classification and measurement of leases

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Amounts due from lessees under finance leases are recognised as receivables at commencement date at amounts equal to net investments in the leases, measured using the interest rate implicit in the respective leases. Initial direct costs (other than those incurred by manufacturer or dealer lessors) are included in the initial measurement of the net investments in the leases. Interest income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised in profit or loss on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset, and such costs are recognised as an expense on a straight-line basis over the lease term except for investment properties measured under fair value model.

Allocation of consideration to components of a contract When a contract includes both leases and non-lease components, the Group applies HKFRS 15 Revenue from Contracts with Customers ("HKFRS 15") to allocate consideration in a contract to lease and non-lease components. Non-lease components are separated from lease component on the basis of their relative stand-alone selling prices.

Refundable rental deposits

Refundable rental deposits received are accounted for under HKFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments from lessees.

Lease modification

Changes in considerations of lease contracts that were not part of the original terms and conditions are accounted for as lease modifications, including lease incentives provided through forgiveness or reduction of rentals.

The Group accounts for a modification to an operating lease as a new lease from the effective date of the modification, considering any prepaid or accrued lease payments relating to the original lease as part of the lease payments for the new lease.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of and on the retranslation of monetary items are recognised in profit or loss in the period in which they arise, except for exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the Group's interests.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. HK\$) using exchange rates prevailing at the end of each reporting period. Income and expenses items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of translation reserve (attributed to non-controlling interests as appropriate).

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax base used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and interest in joint venture, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interest are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Taxation (Continued)

The carrying amount of deferred tax assets is reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax for leasing transactions in which the Group recognises the right-of-use assets and the related lease liabilities, the Group first determines whether the tax deductions are attributable to the right-of-use assets or the lease liabilities.

When the Group makes payments for ownership interest for property which includes both leasehold land and building elements, the entire consideration is allocated between the leasehold land and the building elements in proportion to the relative fair values at initial recognition.

To the extent the allocation of the relevant payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as "right-of-use assets" in the consolidated statement of financial position except for those that are classified and accounted for as investment properties under the cost model. When the consideration cannot be allocated reliably between non-lease building element and undivided interest in the underlying leasehold land, the entire properties are classified as property, plant and equipment.

Depreciation is recognised so as to write off the cost of assets less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Impairment on property, plant and equipment and right-of-use assets

At the end of the reporting period, the Group reviews the carrying amounts of its property, plant and equipment and right-of-use assets with finite useful lives to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss, if any.

The recoverable amount of property, plant and equipment and right-of-use assets are estimated individually. When it is not possible to estimate the recoverable amount individually, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

In testing a cash-generating unit for impairment, corporate assets are allocated to the relevant cash-generating unit when a reasonable and consistent basis of allocation can be established, or otherwise they are allocated to the smallest group of cash generating units for which a reasonable and consistent allocation basis can be established. The recoverable amount is determined for the cash-generating unit or group of cash-generating units to which the corporate asset belongs, and is compared with the carrying amount of the relevant cash-generating unit or group of cash-generating units.

Impairment on property, plant and equipment and right-of-use assets (Continued)

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit impaired.

Impairment of financial assets

The Group recognises a loss allowance for ECL on financial assets which are subject to impairment assessment under HKFRS 9 (including trade and other receivables, loan to a joint venture, bills receivables discounted with recourse, amounts due from related companies and bank balances.) The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL ("12m ECL") represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessment are done based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Group always recognises lifetime ECL for trade receivables.

For all other instruments, the Group measures the loss allowance equal to 12m ECL, unless when there has been a significant increase in credit risk since initial recognition, in which case the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

(i) Significant increase in credit risk (Continued)
Irrespective of the outcome of the above assessment, the
Group presumes that the credit risk has increased
significantly since initial recognition when contractual
payments are more than 30 days past due, unless the
Group has reasonable and supportable information that
demonstrates otherwise.

Despite the aforegoing, the Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) it has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. The Group considers a debt instrument to have low credit risk when it has an internal or external credit rating of 'investment grade' as per globally understood definitions.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

Measurement and recognition of ECL
The measurement of ECL is a function of the probability
of default, loss given default (i.e. the magnitude of the
loss if there is a default) and the exposure at default. The
assessment of the probability of default and loss given
default is based on historical data and forward-looking
information. Estimation of ECL reflects an unbiased and
probability-weighted amount that is determined with the
respective risks of default occurring as the weights.

Generally, the ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and reward of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

Perpetual instruments, which include no contractual obligation for the Group to deliver cash or other financial assets or the Group has the sole discretion to defer payment of distribution and redemption of principal amount indefinitely are classified as equity instruments.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are not subsequently reclassified to profit or loss; instead, they are transferred to retained profits upon derecognition of the financial liability.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Provision of ECL for trade receivables

The Group uses provision matrix to calculate ECL for the trade receivables. In calculating the ECL, the loss rates are estimated based on comparable probability of default by internal credit ratings through groupings of various debtors that have similar loss patterns and recovery rate quoted from international credit-rating agencies and adjusted for forward-looking information that is available without undue cost or effort. Such calculation of ECL has involved subjective judgment and management estimates. At every reporting date, the loss rates are reassessed and changes in the forward-looking information are considered. In addition, credit-impaired trade receivables are assessed for ECL individually.

The provision of ECL is sensitive to changes in estimates. The information about the ECL and the Group's trade receivables are disclosed in notes 23 and 37(ii).

Recognition of deferred tax

As at 31 December 2020, a deferred tax asset in relation to unused tax losses of approximately HK\$192,000,000 (2019: HK\$212,000,000) was not recognised in the consolidated statement of financial position due to the unpredictability of future profit streams. The realisability of the deferred tax asset mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the expectation for future profit streams changes, a recognition of deferred tax assets may arise, which would be recognised in profit or loss for the period in which such a recognition takes place.

As at 31 December 2020, no further deferred tax liabilities have been recognised on the undistributed profits of certain group companies in the People's Republic of China (the "PRC") after 2008 as the Group plans to retain those profits in the respective entities for their daily operations and future developments. In case there is a change in such plan, additional tax liabilities will arise, which will be recognised in the profit or loss for the period in which the management intends to declare such profits in the foreseeable future or the Group's future development plan is amended, whichever is earlier. Details of the above unrecognised accumulated profits are set out in note 32.

On 21 March 2018, the Hong Kong Legislative Council passed The Inland Revenue (Amendment) (No. 7) Bill 2017 (the "Bill") which introduces the two-tiered profits tax rates regime. The Bill was signed into law on 28 March 2018 and was gazetted on the following day. Under the two-tiered profits tax rates regime, the first HK\$2 million of profits of the qualifying group entity will be taxed at 8.25%, and profits above HK\$2 million will be taxed at 16.5%. The profits of group entities not qualifying for the two-tiered profits tax rates regime will continue to be taxed at a flat rate of 16.5%.

The directors of the Company considered the amount involved upon implementation of the two-tiered profits tax rates regime as insignificant to the consolidated financial statements. Hong Kong Profits Tax is calculated at 16.5% of the estimated assessable profit for both years.

notes:

- The above owned properties of the Group represent owned properties on land under medium-term lease in the PRC.
- (ii) Certain owned properties of the Group are erected on land in the PRC with respect to which the Group has not been granted formal title of ownership. At 31 December 2020, the carrying value of such owned properties was HK\$1,303,495,000 (2019: HK\$1,760,103,000). In the opinion of directors, the absence of formal title to these owned properties does not impair the value of the relevant owned properties to the Group as the Group has paid substantially the full purchase consideration of these land use rights and the probability of being evicted on the ground of an absence of formal title is remote. The directors also believe that formal title of these owned properties will be granted to the Group in due course.
- (iii) Certain portions of the owned properties have been leased to a related party as disclosed in note 43 and independent third parties. These owned properties were not reclassified as investment properties as the leased portions are insignificant.
- (iv) Depreciation is provided to write off the cost of property, plant and equipment other than freehold lands and construction in progress over their estimated useful lives and after taking into account of their estimated residual values, using the straight-line method, at the following rates per annum:

18. RIGHT-OF-USE ASSETS (CONTINUED)

For both years, the Group entered into leases for certain of its staff quarters and office premises. Lease contracts are entered into for fixed term of 1 year to 19 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. In determining the lease term and assessing the length of the non-cancellable period, the Group applies the definition of a contract and determines the period for which the contract is enforceable.

In addition, the Group owns several industrial buildings where its manufacturing facilities are primarily located and office buildings. The Group is the registered owner of these property interests, including the underlying leasehold lands. Lump sum payments were made upfront to acquire these property interests. The leasehold land components of these owned properties are presented separately only if the payments made can be allocated reliably.

The Group has obtained the land use right certificates for all leasehold lands except for leasehold lands with carrying amount of HK\$13,560,000 (2019: HK\$13,347,000) in which the Group is in the process of obtaining.

The Group regularly entered into short-term leases for staff quarters. As at 31 December 2020, the portfolio of these outstanding short-term leases is similar to the portfolio during the year ended 31 December 2020 with the corresponding short-term lease expense disclosed in note 12.

The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

19. INVESTMENT PROPERTIES

The Group leases out commercial and industrial properties under operating leases with rentals payable monthly. The leases typically run for an initial period of 1 to 10 years, with unilateral rights to extend the lease beyond initial period held by lessees only. Majority of the lease contracts contain annual lease payment that are fixed over the lease term.

The Group is not exposed to foreign currency risk as a result of the lease arrangements, as all leases are denominated in the respective functional currencies of group entities. The lease contracts do not contain residual value guarantee and lessee's option to purchase the property at the end of lease term.

The directors of the Company review the capital structure on a regular basis. As part of this review, the directors consider the cost of capital and the risks associated with each class of capital. Based on recommendations of the directors, the Group will balance its overall capital structure through the payment of dividends, new share issues and share buy-backs as well as the issue of new debt or the redemption of existing debt.

The sensitivity analysis includes only outstanding foreign currency denominated monetary items (including intercompany balances denominated in foreign currencies) and adjusts their translation at the year end for a 5% change in foreign currency rates. On this basis, there will be an increase/decrease in post-tax profit and equity where the functional currency of the relevant group entities strengthens against the foreign currencies by 5%, and vice versa.

(b) Interest rate risk

The Group's bank balances carry floating-rate of interests and have exposure to cash flow interest rate risk due to the fluctuation of the prevailing market interest rates. However, the Group considers that the bank balances are within short maturity period, and the fluctuation in interest rate and the cash flow interest rate risk arising from bank balances are insignificant.

The Group's fair value and cash flow interest risks mainly relate to fixed and variable rates borrowings respectively. The Group has not entered into any interest rate hedging contracts, but considers that the interest rate of bank borrowings is relatively stable and so no interest rate swap was used to hedge the exposure to interest rate risk in current year. The management monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise.

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to interest rates for non-derivative instruments at the end of the reporting period. For variable-rate bank borrowings, to the extent that they were not hedged by effective instruments, the analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis points increase or decrease in interest rate is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

For bank borrowings at variable-rate of HK\$9,708,216,000 (2019: HK\$12,018,656,000), if interest rate had been 50 basis points higher/lower and all other variables were held constant, the Group's post-tax profit for the year ended 31 December 2020 after taking into account the capitalisation of borrowing costs using the capitalisation rate ranging from 1.92% to 3.78% (2019: 3.20% to 3.30%) would decrease/increase by HK\$3,067,000 (2019: decrease/increase by HK\$35,862,000).

Credit risk and impairment assessment

As at 31 December 2020, the Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position.

In order to minimise the credit risk, management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group performs impairment assessment under ECL model under application of HKFRS 9 on trade balances individually or based on provision matrix. In this regard, the directors consider that the Group's credit risk is significantly reduced.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with good reputation.

Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Accordingly, the Group's concentration of credit risk is considered minimal.

Liquidity risk

In management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by management to finance the Group's operations and mitigate the effects of fluctuations in cash flows. The management monitors the utilisation of bank borrowings and ensures compliance with loan covenants.

The Group relies on bank borrowings as significant source of liquidity. As at 31 December 2020, the Group has available unutilised banking facilities of approximately HK\$23,199,742,000 (2019: HK\$15,093,800,000). Details of bank borrowings are set out in note 31.

The following tables detail the Group's remaining contractual maturity for its financial liabilities based on the agreed repayment terms. For non-derivative financial liabilities, the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. Specifically, bank loans with a repayment on demand clause are included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities are based on the agreed repayment dates. The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curve at the end of the reporting period.

In addition, the following tables detail the Group's liquidity analysis for its financial instruments. The tables have been drawn up based on the undiscounted contractual net cash flows on derivative instruments that settle on a net basis. When the amount payable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves existing at the end of the reporting period. The liquidity analysis for the Group's derivative financial instruments are prepared based on the contractual maturities as the management consider that the contractual maturities are essential for an understanding of the timing of the cash flows of derivatives.
